

## WHAT WE DO

**RNG Unlimited** provides high volume, on-demand manufacturing, order fulfillment and distribution solutions for companies looking to maximize their full retail potential. With over 9 years of unique industry experience, **RNG Unlimited** is an expert at managing expansive retail operations and conquering the challenges that go hand-in-hand with market growth.

We understand the everyday hurdles and frustrations that go along with running a business. Whether you are an artist working to get exposure or a small business hoping to introduce a new product line, **RNG Unlimited** is there to help every step of the way.

## Product Development & Manufacturing

### “THE PRODUCTS WE MAKE, MAKE YOU”

Working extensively with artisans, photographers, and designers we understand the importance of finding the right manufacturing process for your product. Developing a quality product is the foundation of your business. Utilizing the latest tools and technology, **RNG** works to identify and improve voids that may exist in your current offering.

Through flexible manufacturing options, our clients feel confident responding to new business opportunities as they arise. Whether it is an unexpected large purchase order or a request for a product sample, these events can easily be managed. **RNG Unlimited's** manufacturing services provide our clients with the ability to quickly deliver a quality product.

**RNG Unlimited** creates the products that you want, made the way you expect them to be made. We recognize that you have a specific brand and a responsibility to meet customer expectations. Each product is made with the attention to detail and quality that it deserves.

## Order Fulfillment

### “SEAMLESS. WE PICK UP WHERE YOU LEAVE OFF”

We understand that an artistic mind is a creative mind. And when a creative mind is focused on mundane tasks such as taping boxes, creating shipping labels, holding inventory and coordinating with shipping carriers, frustration can arise!

Order fulfillment can be an exhausting process that takes up large amounts of time and energy. As the demand for next-day service to the consumer increases, **RNG Unlimited** is strategically positioned to execute all of your fulfillment needs. Our warehouse team enjoys the order fulfillment process. We package and ship items every day and have become experts at managing the process from start to finish. By eliminating order fulfillment and other non-revenue generating tasks, you have more time to do what you love.

**RNG Unlimited** has the ability to manufacture, package and ship your products all from the same location. Direct to customer drop-shipping, freight logistics and wholesale order fulfillment are all part of our daily repertoire. Even if your company handles manufacturing in-house or uses another company, we have the ability to store inventory, pull orders and run “pick and pack” operations.

We are here to work in the business so you can work on it!

## ■ Distribution

### “WE GROW AS YOU GROW”

One of the more unique aspects of **RNG Unlimited** is the network of partners we have built over the years. We value the relationships formed with both our online and physical retail outlets. Our company has worked closely with hundreds of vendors ranging from boutique, brick and mortar storefronts to large corporate wholesalers such as Wayfair and Amazon Vendor Services.

For many artists and designers, determining the right channel to sell their products can be a difficult task. Pricing, product offering and wholesale account terms are all important factors to consider.

**RNG Unlimited** will make sure you comply with any unique order fulfillment requirements and guidelines. We work with our clients to help negotiate terms and place their products with the best vendors.

We understand that wholesale accounts can be an intimidating process. At **RNG** we want to make sure our clients are comfortable with the growth of their business. Ensuring they have a dependable resource to turn to is something that we take pride in.

Let **RNG** expand your company's reach and allow it to grow in ways you never would have considered.

## Summary

As demand for product grows from the consumer, so does the time, energy and resources dedicated to manufacturing, order fulfillment and distribution.

**RNG** works with artists. We work with the creative types that would rather spend more time creating a new product design than source materials or input shipping labels. We work with the person that would rather grow their business than research the UPC code requirements to adhere to Amazon international product guidelines.

We are the option that lets artists, photographers and designers put their time and resources into things that they love to do rather than things they feel burdened to accomplish.

We look forward to speaking to you directly about how we can be of assistance.

## Custom Projects

Have an idea but need help executing?

Through our industry experience and our expansive network of partners we can develop programs that fit clients of all sizes and types.
